Getting  
started

## Why business verbs?

Do you need English in your business? Do you need a lot of special English words? Do you think to yourself – Where can I find out what these words are?

Business is about action, and many of the words associated with business are verbs. If you learn all the verbs in the *Penguin Quick Guide to Business English Verbs* you will be well on the way to communicating effectively through English in business situations. And there are two other business books in the series – *Business English Words* and *Business English Phrases*.

## **What's in this book?**

This book contains over three hundred very useful business verbs. Each chapter presents these verbs under familiar business topic headings. The **Review** page at the end of each chapter tests your understanding. Answers to these questions are in the **Answers** section at the back of the book.

All the verbs in the book are also listed in the **Business Verbs Index**.

## **Why is this book called a *Quick Guide*?**

Because it guides you quickly to the most important words for you. And because you

can learn all these words in a short time.

Spend ten minutes each day with this book – and see how quickly you learn.

Here is one way of working with the book.

- Choose a relevant chapter. For example, *Staying in touch* presents important verbs for communicating by phone, fax, e-mail and post. This chapter is probably useful for everyone. Read the chapter. How many of the business verbs do you understand?
- Answer the questions in the **Review** at the end of the chapter. Then go to the **Answers** section. Were you right?
- Now go to the **Business Verbs Index**. Write the words in your language.

you!

No, I'm sorry, I can't **put** you **through** to Mrs Porter. I can't **connect** you to anyone ...

No, I'm afraid you can't **hold on** ...

No, she won't **call** you **back**. She can't **ring** you **back** and nobody is going to **return** your call ...

And no, I can't **transfer** you to another line ...

Hi John,

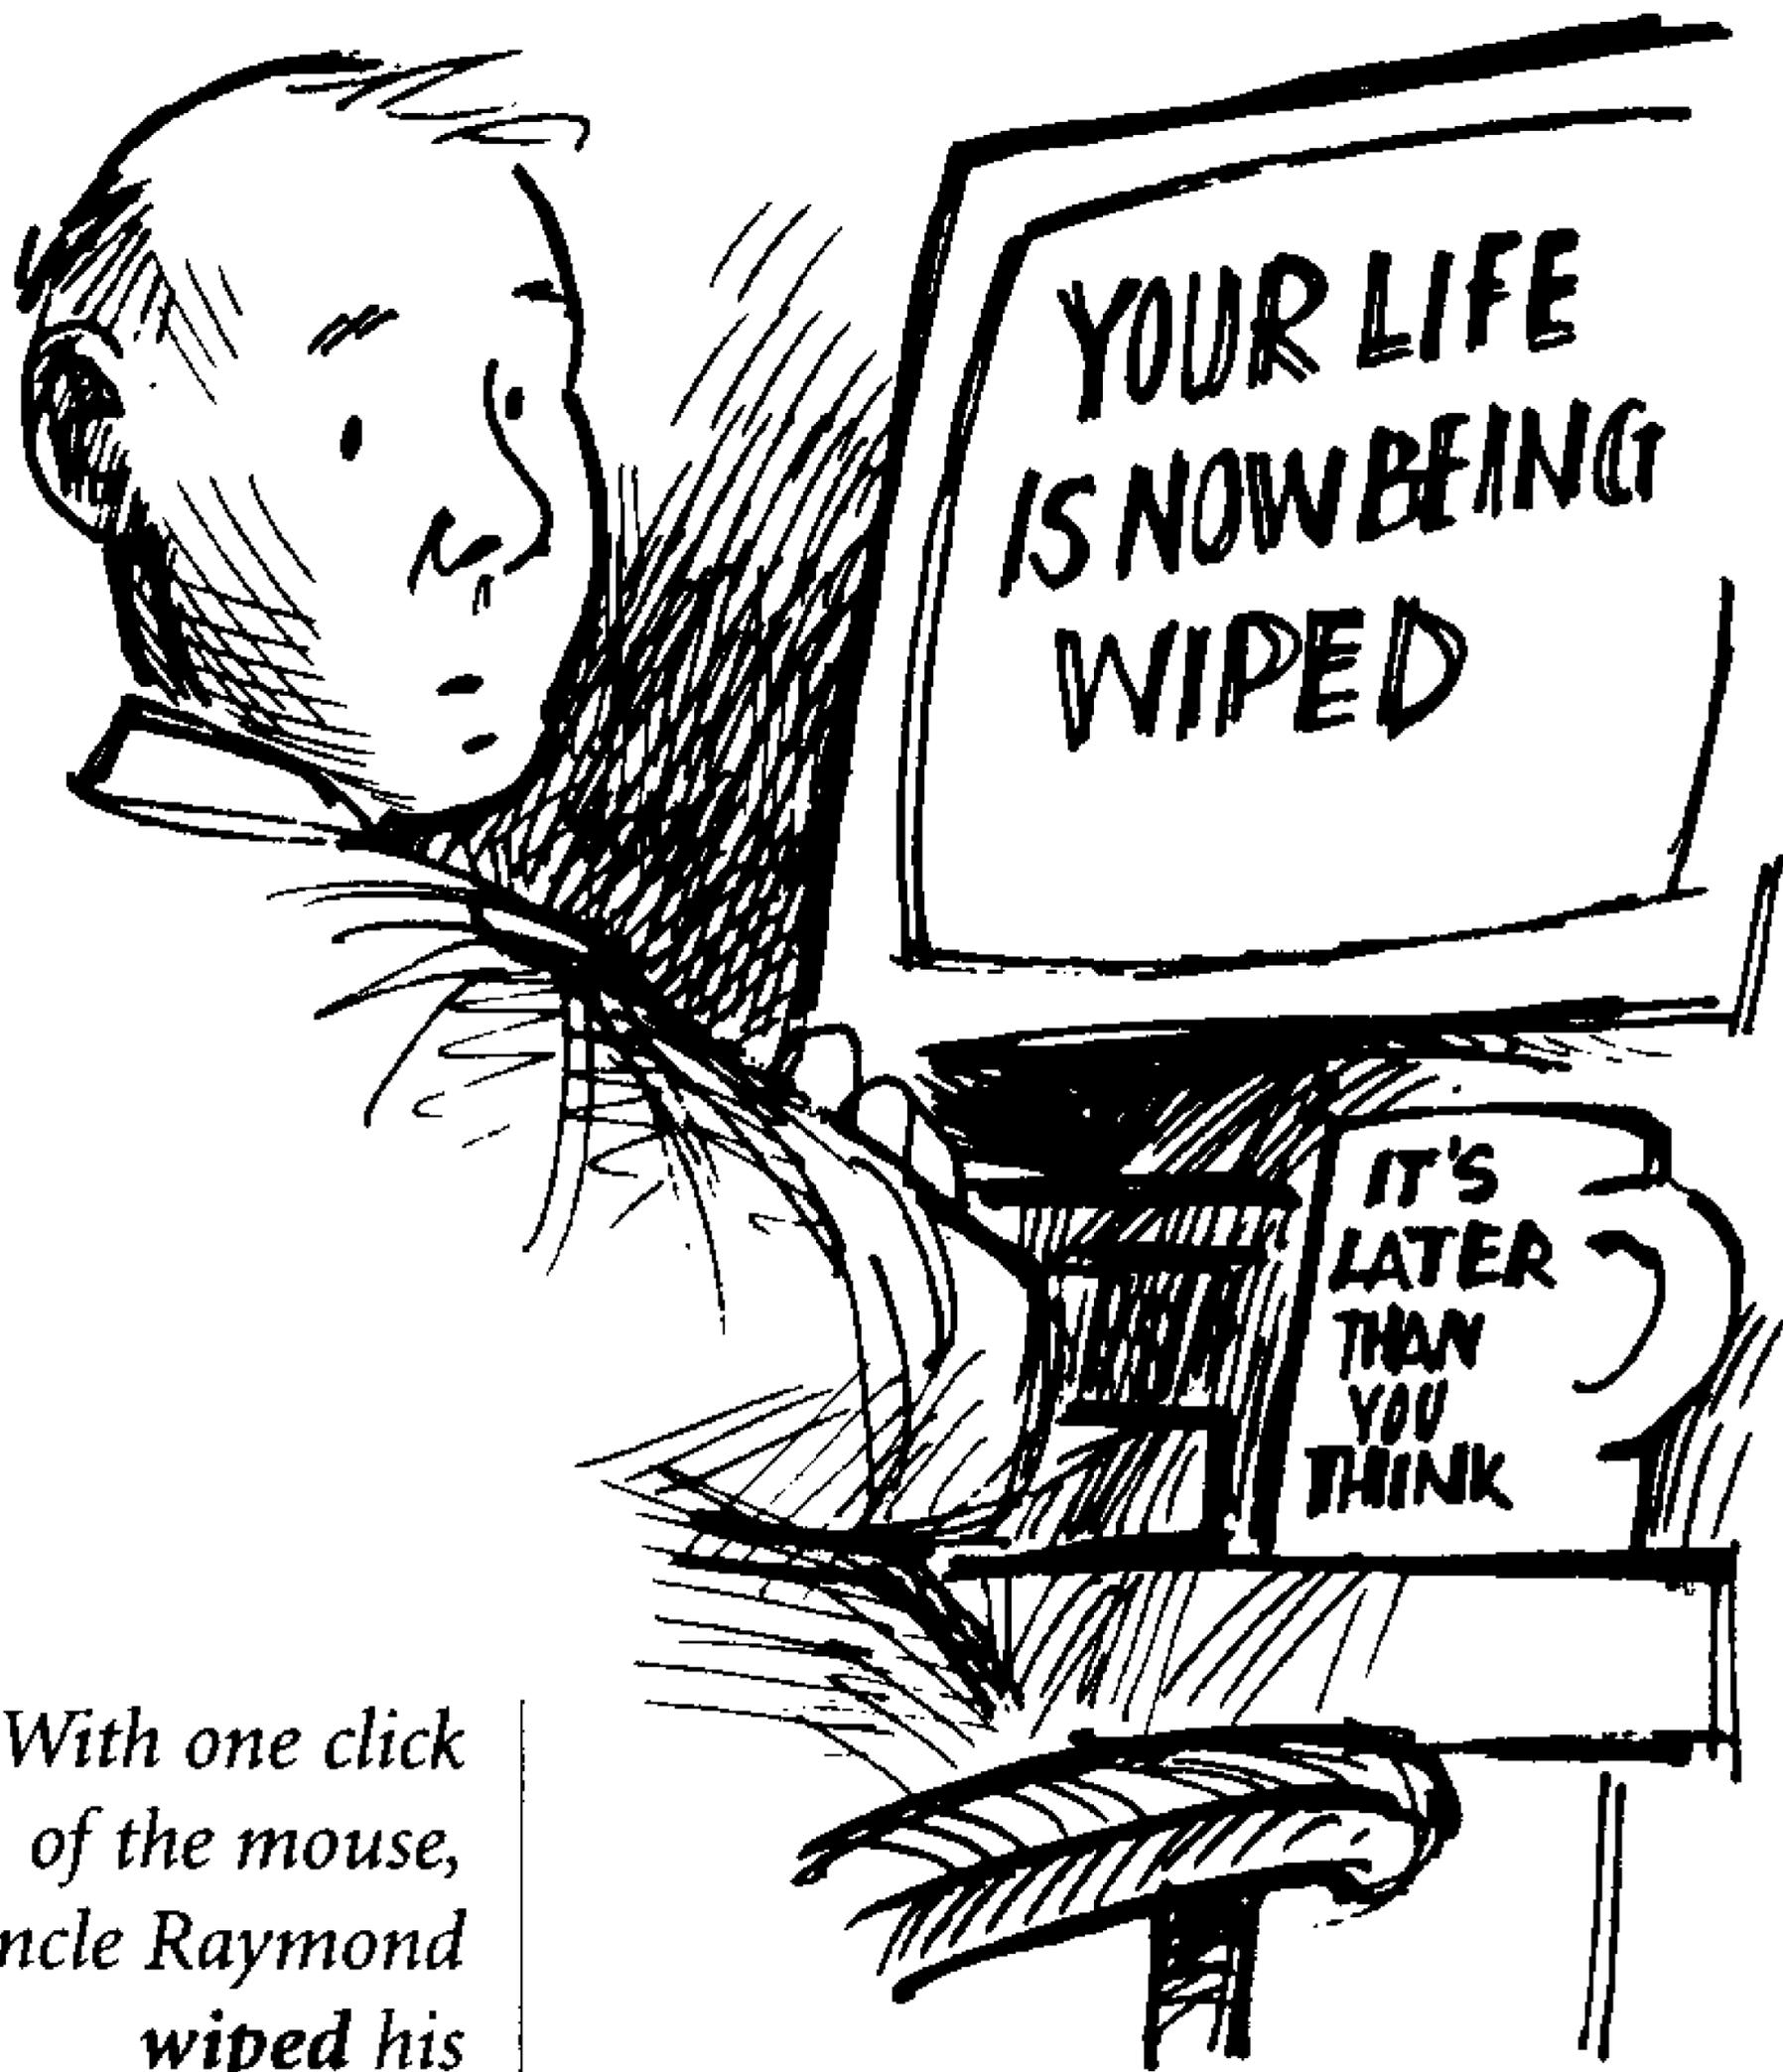

I found the report that you **attached** to your e-mail when I **logged on** to my computer this morning. I thought the report was great. I wanted to keep it, so I tried to **save** it to my hard disk. Unfortunately, I **clicked** on the wrong button and I **deleted** it instead! I tried to **undo** the command, but that didn't work. So I **searched** for it, but it just wasn't there. Could you send it again?

Many thanks,

Rita

Dear Rita,

I'm pleased you liked the report – but I'm afraid it wasn't mine. Caroline wrote it and **e-mailed** it to me. I **forwarded** it to you because I thought you'd be interested. However, there's some bad news. When I tried to **call it up** just now I found that it had been **wiped** from *my* computer too – it was gone! But don't worry – I **printed** a copy before that happened so I'll **post** it to you.

Who needs e-mail? If I want to send a message to someone, I write a letter, put a stamp on it and **mail** it. It's simple and cheap.

If I've got a package, I **wrap** it and ask the post office to **deliver** it for me. You can't do that with e-mail, can you? And if it's urgent I get a motorbike rider to **courier** it for me. Then I know for sure it will be **received** safely. So I'll stay with snail mail, thank you very much.

Dear Sonia,

I hope this fax **comes through** successfully. I've had a terrible time trying to **get** it to you. My fax machine was **dialling** and **redialling** your number for about three hours yesterday afternoon, before I decided that I'd had enough and **cancelled** it.

What was the problem? Perhaps your machine had **run out** of paper? Or maybe you just hadn't put the paper in properly – you really should read the instructions about how to **load** it.

# On the job

# Job description

*They all

Your job is to **supervise** the six people at the front desk – you make sure they all know what they're doing and that they don't make any mistakes. You **report to** Simon, who's the head of customer services. He **manages** you and four other supervisors. He also **liaises with** the heads of the other departments so that they all know what everyone else is doing. And, of course, as I'm the boss, they all **answer to** me.

Dear Ms Zink,

Thank you for your enquiry about job vacancies. We are a small company and **employ** just six people on a full-time basis. However, we always **take on** extra staff during our busy summer months and so we are **hiring** at the moment. If you would like to **apply** for one of these temporary positions, please call me, so that we can arrange a time to **interview** you.

Yours sincerely,

Manfred Seltzer

# Career development

*If you are having problems, we train you to deal with them.*

Every year we **appraise** you – in other words, we talk to you about your work over the past year. If you're having problems, we **train** you to deal with them. If you've done well, we try to **promote** you, although competition for the top jobs is tough so you could be **passed over** for promotion even if you have done well. And, of course, if you haven't **performed** well enough, we'll probably **demote** you, because in this company only the best is good enough.

# Industrial relations

*I'm warning

These discussions have taken far too long and I'm not going to **negotiate** any more. As the trade union spokesman, I **represent** over half the workers in this factory and I'm **warning** you – if the workers that you've **suspended** aren't allowed back to work by the end of the day, we'll all **go on strike**. That's right – we'll **walk out**.

## NOTICE

These are the only ways that you can lose your job at this company.

- Employees who steal will be **dismissed**.
- Anyone who contradicts the boss will be **sacked**.
- Salespeople who don't meet their targets will be **fired**.
- When business is bad, the laziest workers will be **laid off**.
- And if the company goes bankrupt, everyone will be **made redundant**.
- If you don't like any of these rules, you're free to **resign** and find another job.
- But if nothing goes wrong, you have a job for life and you can **retire** happily at the age of sixty-five.

### ***The end for Sycamore?***

Sycamore Stores **started out** with just one shop in a small town. The owner was ambitious and wanted to **expand**, so he **acquired** a small chain of shops in the nearest city. After a few years he **took over** another company by buying over 50% of their shares. Over the next few years he **bid for** several other companies, but he never succeeded in buying them. Then last year a huge multinational decided to buy Sycamore Stores and so they just **swallowed it up**.

# Getting smaller

*The corporation  
was divided in

In the 1990s the Red River Corporation was one of the world's great multinationals, before it was **broken up** into smaller parts. First it was **divided** in two. One half was **split up** into a number of smaller companies. The other half was bought by a bank which **stripped** its assets – including valuable city centre properties, which were sold to a supermarket chain – and then allowed the rest to **go out of business**.

## Internal Memo

The truth is that our factories are much too old-fashioned – this company needs to **invest** in new machinery. But where's the money going to come from – how are we going to **fund** this? In our position, the only practical way to **raise money** is to **issue** more **shares**. And let's hope that people buy them, because if they don't we're almost certain to **go bankrupt**.

# Dealing

**deal**  
**trade**  
**go long**  
**go short**  
**hedge**

She **deals** in shares. Normally she just **trades** – in other words, she buys and sells. But it's not always as simple as that. Sometimes she **goes long** – she buys shares and keeps them because she thinks their value will rise. And sometimes she sells shares that she hasn't bought yet because she thinks their value will fall – that's called **going short**. Obviously it's risky but she can always **hedge** by buying lots of different kinds of shares and hope that if one goes down another will go up.

Sometimes she  
goes long ...  
and sometimes  
she goes short.

# Cars

Dear Angelike

The best way to get to our office is to **drive**. I can give you the phone number of a local company where you can **rent** a car cheaply or, of course, you can **hire** one from one of the big companies when you arrive at the airport. The problem with renting at the airport is that you have to **return** the car there when you've finished with it. And don't forget to **insure** the car in case you have an accident.

*Don't forget

# Hotels

*Don't

## Dear Guest

When you **check in**, we ask you to pay the full price for your room in cash. To keep our prices low, there are no porters at this hotel so you have to carry your luggage yourself. You have to **check out** by nine o'clock in the morning but you can **store** your bags in our luggage room for a fee of just £15 per day.

If you don't like the hotel's policies, don't **complain**, just **move** to a more expensive hotel!

Reginald was **chairing** the meeting today, so it was very formal. At the beginning he introduced every single person and asked us all to **exchange business cards** – which was pointless, because we knew each other already. We've been **discussing** the plan all afternoon. Things started quietly. First we **talked over** our roles in the project and then we **debated** the good and the bad points of the plan. Unfortunately, everybody had a different opinion on the budget, so we **argued** about that for ages. It took us over an hour just to **thrash out** a solution on that one point.

Okay. Let's **summarise** the position. This is what we've decided so far.

I **agree** with you on point one, that's okay.

But we **disagree** on point two, so that's still a problem.

We've **compromised** on point three – I've given a bit and so have you.

Can we please **settle** this whole thing now and go home?

It takes such a long time to **hammer out** a deal, doesn't it?

# Buying and selling

**shop around**

**sell off**

**purchase**

**pick up**

**sell out**

**auction**

The World Wide Web makes it easy for people to **shop around** for the cheapest price by moving from one website to another. It shouldn't take long to find a company which is **selling things off** cheaply. This means that big companies can now **purchase** their supplies more efficiently and ordinary people can **pick up** things at much better prices than before.

It's also easy to find what you want. If one company has **sold out** of a

product, you can probably find it at another website. And if you're looking for something rare, visit a website which **auctions** unusual things to the buyer who pays the highest price.

*If you're looking for something rare, visit a website which **auctions** unusual things.*

# Negotiating

**bargain**

**haggle**

**reduce**

**barter**

**refund**

I learnt to negotiate in our local street market. The traders all hated me because I **bargained** over everything. I knew their prices weren't fixed so I always **haggled** until they **reduced** them. When I didn't have enough money to buy something, I **bartered** – I tried to exchange something of mine for something of theirs. And if I didn't like something that I bought I always took it back and, of course, they always **refunded** my money.

A: There's a mistake in my bank statement again. They've **debited** £100 from my account for no reason.

B: What about the money you took to the bank and **deposited** last week?

A: They still haven't **credited** that to me either, so I've got no money in my account.

B: Well, why don't you transfer some money from another account?

A: But I need to **withdraw** money today. I want to go shopping.

B: You can **cash** a cheque with me, if you like.

A: Oh, thank you. I'll **repay** you as soon as I've sorted this out.

He's always been dishonest; he's **tricked** people out of their money all his life. He was sacked from his first job when he **swindled** one of his customers by making him pay the bill three times. He lost his second job when he **defrauded** his company of several thousand pounds which went straight into his bank account. The end came when he tried to **bribe** a police officer by offering him a gold watch. In court the judge **fined** him a large sum of money and sent him to prison for several years.

# GRIFFITH MARKETING CONSULTANTS

BIRMINGHAM, UK

Dear Mr Campbell,

When you first **consulted** us about your new marketing strategy, we were happy to **advise** you. Over the past year we have **suggested** a number of solutions to the immediate problems that your company faces. We have also **recommended** several longer term strategies.

However we have now **concluded** that your real problem is that you never listen to anybody else and for this reason we wish to end our working relationship with you.

Yours sincerely,

We **admit** that we were wrong and we **apologise** for our mistakes. Everyone in the company is sorry and the two people who were responsible have **confessed** to what happened and told us the whole story. We're not going to give you any reasons for what happened because it's not possible to **justify** our actions. But as you can see, we're not going to **cover up** our mistakes and we'd like to **assure** all our customers that something like this will never happen again.

A: So where are your products made?

B: Well, the outside of the box says that they're **produced** in France, but that's not the whole story.

A: What do you mean?

B: Well, most of the parts are **manufactured** in Taiwan.

A: And are they **assembled** in France?

B: Oh no. The parts are **put together** in a factory in Mexico.

A: So what do you do in France?

B: We **package** them in France – we put the products into their boxes – and of course our head office is there, as well.

**T**HE PROCESS of **developing** a new product from an idea on a piece of paper to the finished item on a supermarket shelf can take many years. Our scientists are always **experimenting** with different combinations of materials and our marketing team is always **researching** possible gaps in the market. When they have found a new product and believe that there is a market for it, we **pilot** the product by testing it in a small part of the market and **monitoring** people's reactions to it. If we get a good response we then **design** some attractive packaging and start to sell the new product around the world.

Our scientists are

Nothing leaves this factory until it has been **inspected** by a team of top scientists. They **check** to make sure that there are no defects in any of the products. If they find something wrong, the product has to be **reworked**. We **remove** the defective part and we **replace** it with a new one. Then our scientists check it again. If they find a problem this time, the product cannot be sold and is simply thrown away. Quality is very important to us.

A: And what about the paintwork?

B: Oh, don't worry about that. We can **spray** the car any colour you like.

We **stock** all the components for the factory in this warehouse, which means that we normally store over a thousand different parts here. Every time our supplier **delivers** new components, we have boxes and crates everywhere which we have to **put away** in their proper places. So I want you to **lift** all those crates up onto the top shelves. And when you've done that, you can **shift** those boxes from the front door to the back of the room.
